

Parts made of softwood (spruce, pine or fir). All parts 36 mm thick (plane 1 mm off each side of 1.5" thick construction lumber

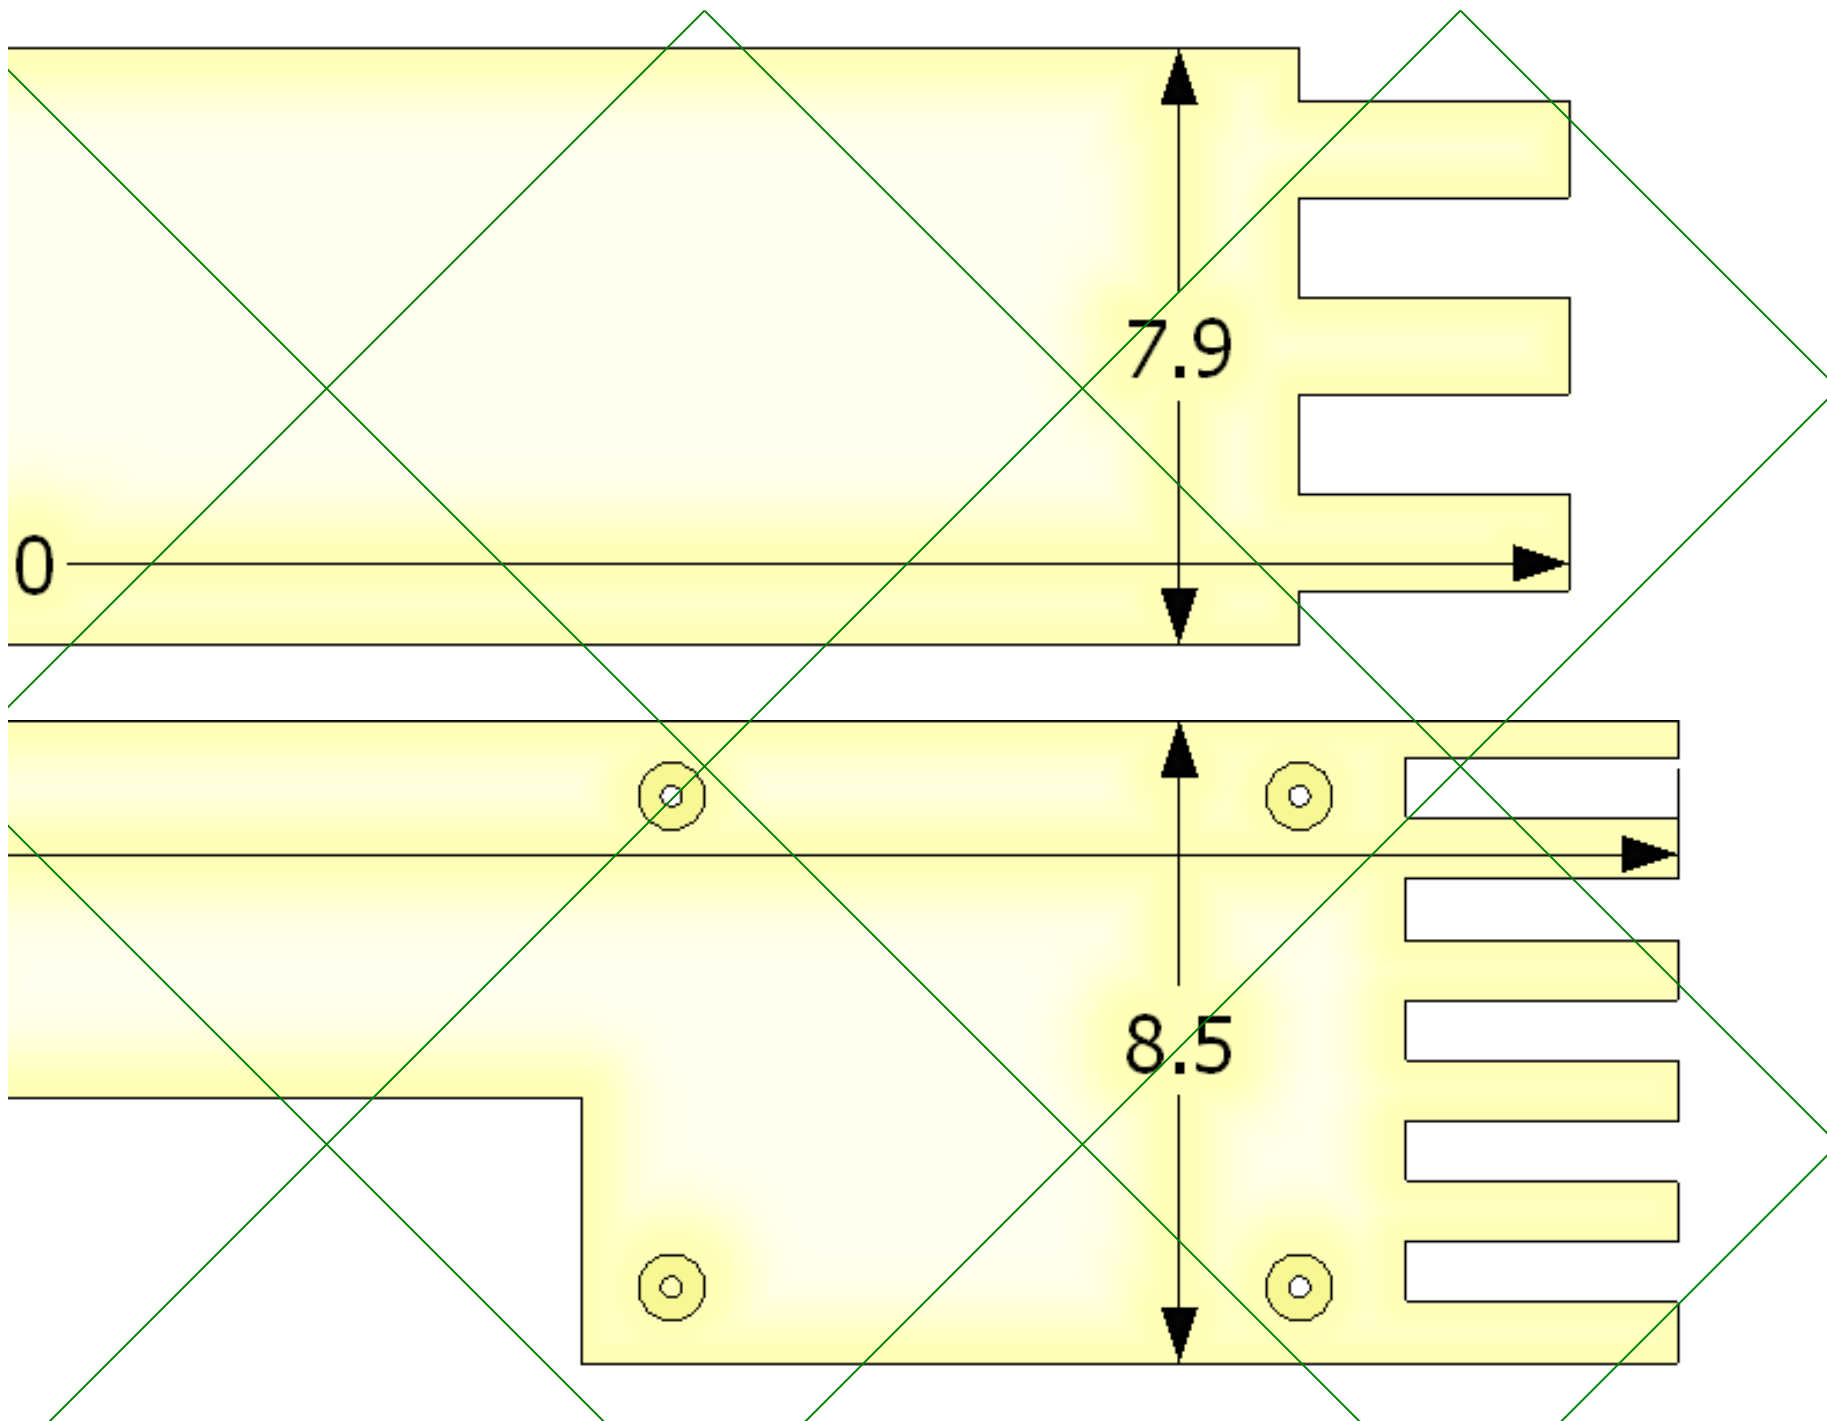

The image shows two technical drawings of yellow mechanical components. The top component, labeled 'Table support back', has a rectangular body with four horizontal slots on its left side. A dimension line with an arrow points to the left edge of the bottom slot, with the value '42.' at the right end. The bottom component, labeled 'Template holder bottom', is wider and has six horizontal slots on its left side. It features four circular holes: two on the top half and two on the bottom half. A dimension line with an arrow points to the left edge of the top slot, with the value '48.0' at the right end. The entire image is overlaid with a large green 'X'.
